

PETER PAUL POLOAN

Sorsogon City, Sorsogon, Philippines • Born June 29, 2004
0992 388 5169 • peterpaulpoloan@gmail.com

EDUCATION

Sorsogon State University – Bulan Campus

Bachelor of Science in Computer Science

Bulan, Sorsogon

Expected 2027

- College of Information and Communication Technology (CICT)

EXPERIENCE

Tidework LLC

Remote (Work from Home)

Technical QA Intern

- Designed and executed test cases to verify features against requirements, following Software Testing Life Cycle (STLC) practices.
- Identified, documented, and tracked defects with clear reproduction steps, and verified fixes before release.

PROJECTS

Full project showcase with live demos: **portfolio-sigma-snowy-73.vercel.app**

- Plan each project through the SDLC: define requirements, design the architecture and data flow, then choose the tech stack that fits.
- Build features quickly with AI-assisted development tools (Claude Code, Obra Superpowers, Graphify), reviewing and testing all generated code.
- Use Firebase Firestore and Firebase Authentication as the backend and user sign-in for most projects, and Supabase for relational data with row-level security.
- Manage source code with Git and GitHub, and deploy web applications to Vercel.
- Test using STLC practices and the testing pyramid (unit, integration, and end-to-end tests).

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Python

Development: Web applications, Android development

Backend & Cloud: Firebase (Firestore, Authentication), Supabase, Vercel

AI-Assisted Development: Claude Code, Obra Superpowers, Graphify

Tools: Git, GitHub, NumPy

Practices: Software architecture, SDLC, STLC, testing pyramid (unit, integration, end-to-end)

STRENGTHS

- Ships features quickly with AI-assisted tools while reviewing, testing, and verifying the output.
- Takes full ownership of assigned tasks and explains technical work clearly to technical and non-technical audiences.
- Eager to learn; interested in cybersecurity and machine learning/data science.
